SOLAR POOL HEATING

# Get more from your pool!

Nothing feels much better than a full body plunge into a soothingly warm pool. Warm water wraps around you and relaxes every muscle in your body.

The entire family will enjoy more time in your pool. Think about all the extra months of fun, exercise and sheer relaxation.

A Heliocol Solar Heating System with patented Individual Tube Design™ technology will bring you many years of safe, worry-free, comfortable enjoyment in your pool.

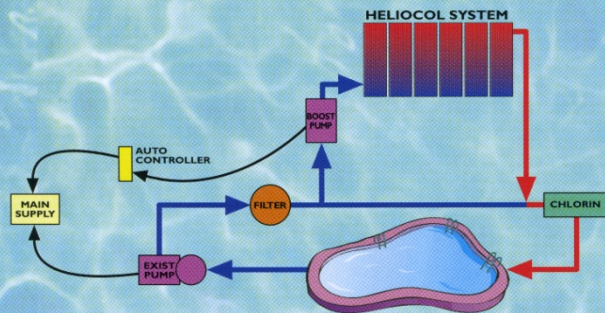

- ✓ **More use of your pool!**
- ✓ **More safe family fun!**
- ✓ **More healthy exercise!**
- ✓ **More night time swims!**
- ✓ **More BBQ's by the pool!**
- ✓ **More time at home for all the family!**

## What can I expect?

Subject to location, seasonal variations, and individual comfort needs, the graph below is an example of how swimming seasons have been dramatically extended for hundreds of Australian families. Your local Heliocol supplier will be happy to discuss this with you.

## How does it work?

Heliocol solar panels are installed on your roof in a sunny position. Your pool water is pumped through hundreds of tubes in the collectors where it absorbs the sun's heat (think of a garden hose lying in the sun). This warmed water is then returned to the pool for your enjoyment.

The booster pump is shown here installed after the filter. Alternatively, if separate solar lines have been installed into the pool, the solar system can ideally be installed on a separate circuit. Ask your Heliocol supplier for details.

## Customer comments!

Prior to installing our Heliocol system in 1998 we hardly used our pool as it was too cold. Since then we have used the pool much, much more. The heated pool has changed our lifestyle with night pool parties and enjoyment for the whole family.

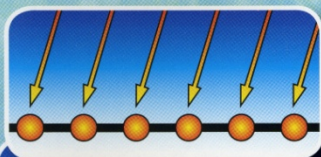

Mr & Mrs Robinson Para Hills South Australia

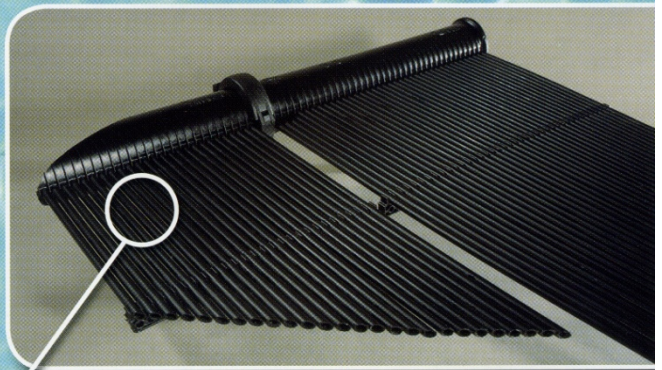

# A lifetime of use!

Years of improvements have made Heliocol's **Individual Tube Design™** the ultimate in simplicity and effectiveness. From efficiency to long term durability to our **25 year warranty**, Heliocol offers unrivaled benefits.

**Maximum Efficiency.** Heliocol collectors have been engineered to employ what is known in the solar industry as a fully wetted surface. This provides maximum exposure to the sun, allowing all water to be in direct contact with the tubes. See diagram

LEFT: OTHER STYLE TUBE AND FIN COLLECTOR.  
BELOW: HELIOL COLLECTOR INDIVIDUAL TUBE DESIGN™

**Secure Installation.** Because Heliocol collectors are secured firmly to the roof with roofing fixings, and with successful wind tunnel tests exceeding 200kph, they are ideal in high wind areas and on steeper roofs.

**ISO 9001-2000.** Heliocol's certification to the International Standard - ISO 9001-2000 - certifies the world's highest standards in manufacture.

**Cockatoo Tough.** Heliocol, with tough polypropylene construction, is extremely resistant to cockatoos, possums and other vermin. Ask to see a copy of our **Cockatoo Warranty**.

**Built to Last.** Heliocol collectors are manufactured from UV stabilised polypropylene utilising a unique overmoulding process. During this process, the headers and the individual tubes are moulded into one piece, thereby eliminating hundreds of individual joins. Please ask to see a sample collector.

**World's Largest Solar Manufacturer.** Heliocol solar collectors have been engineered and manufactured by the same company in the same factory for nearly 30 years. Heliocol is now ranked as the world's largest solar pool heating manufacturer.

## Ultimate Peace of Mind Warranty!

We believe Heliocol provides the best warranty in the business. Our **Peace of Mind Warranty** provides you with **25 years of protection**. With over 28 years experience, and now as the World's Largest Solar Manufacturer, Heliocol has the strength, expertise and reputation to deliver on its promises. Ask to see our full warranty document.

## Customer comments!

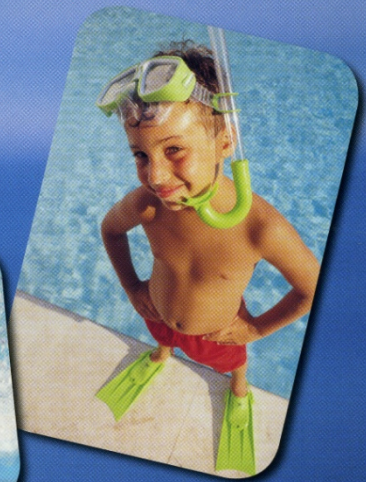

Dear Bruce and Gail. Please accept this as my appreciation for the great job on the installation of my Heliocol pool heater. I was pleased with the workmanship of your installers and the temperature results so far have been amazing. Great job. Pass on my thanks to all concerned.

Arthur Fisk  
Coffs Harbour NSW.

With such durability reliability and long-term usability is it any wonder Heliocol sells more solar pool heating systems in the world than any other manufacturer?

So take the plunge today and schedule your free pool heating analysis and start enjoying a warm, inviting pool with a Heliocol solar pool heating system.
